

**ATS/Chiesi USA, Inc. Research Grant in Obstructive Lung Disease**

One grant available for 2026

\$50,000/one year

*Target Audience:*

Early-stage investigators interested in obstructive lung disease research.

This grant will support research that has a high likelihood of advancing the understanding of obstructive lung disease through basic, translational or clinical research. Granted funds may be used to provide salary support for the PI or ancillary staff, to purchase supplies and/or reagents, or for subject enrollment fees directly related to the project or other allowable costs.

Indirect costs will not be paid to the sponsoring institution.

Fully funded by [Chiesi USA, Inc.](#)
